

PHT ePRO System Extensions & Enhancements - 2012

In case you haven't kept in touch with PHT, here are this year's new and efficient ways to acquire, manage and analyze data collected directly from patients.

I. COLLECT EPRO DATA ON A PATIENT'S SMARTPHONE, OR ON LARGER TABLETS

- A. **SitePad®**: The popular solution used to collect ePRO and eClinRO at a clinical site has expanded to include tablets with 10" and 12" screens.
- B. **NetPRO™**: Patients record their data via NetPRO on the Internet, proving extremely cost effective for large trials and late phase, post-marketing studies. Sponsors and CROs use NetPRO for Multiple Myeloma, Depression and Diabetes indications.

II. MONITOR EPRO DATA DASHBOARDS ONLINE AND/OR IN TRANSIT

- A. **SmartReports™** within the PHT StudyWorks™ patient data portal is an intuitive tool that provides an unprecedented level of detail within patient data reports. This enables project managers, monitors and sites to sort by report headers; drill-down within subject and site data; and view reports in native language translations.
- B. **SmartReports Mobile**: This ePRO smartphone application allows monitors to check that sites and subjects are compliant with specific protocol and can locate those subjects that need follow-up. One tap immediately calls the site to expedite any issues. Users can also tap on the site to activate the GPS capability of the smartphone to locate the site quickly.

Trial Name Here		
Subject Compliance	Missed	Pending
5009-002 79 %	3	0
5009-016 86 %	2	0
5009-009 83 %	1	0
5009-019 100 %	0	0
5009-021 100 %	0	0

III. CONNECT ONLINE TO THE PHT SUPPORT CENTER

- A. **Live Chat** is available 24/7 to all project managers, monitors and sites with an Internet connection via phtcorp.com and SmartReports.

IV. TRANSFER & INTEGRATE DATA WITHIN THE NEWEST DATA STANDARDS

- A. Data managers can elect to receive ePRO data transfers via **SDTM**, in addition to **ASCII** or the New **SAS**. SDTM is recommended for CDISC submissions, ever since CDISC finalized a domain for PRO in 2009.
- B. As always, PHT data integrates with EDC systems such as Medidata Rave®.

V. PROVIDE TRAINING ON DEMAND, ONLINE

- A. **Site and Subject training videos** are available through StudyWorks at any time. They are sorted by specific training sections, for maximum efficiencies.

PHT continues to heavily invest in global research & development for all phases of clinical development and postmarketing studies
